Contents for Volume 144

Number 1, 10 May 1990

STARZAK, M. E., The Kinetics of Interacting Gates in Potassium Channels. A Comparison of Linear and Non-linear Models 1

KOESLAG, J. H., Koinophilia Groups Sexual Creatures into Species, Promotes Stasis, and Stabilizes Social Behaviour 15

COLDING-JØRGENSEN, M., Fundamental Properties of the Action Potential and Repetitive Activity in Excitable Membranes Illustrated by a Simple Model 37

MARTIROSOV, S. M., Direct Transduction of Energy by Dithiol-Disulfide Interconversion 69

STEINBERG, I. Z., Computer Simulations of Electrical Bistability in Excitable Cells due to Non-inactivating Sodium Channels: Space- and Time-dependent Behaviour 75

VARELA, F. J. and STEWART, J. Dynamics of a Class of Immune Networks I. Global Stability of Idiotype Interactions 93

STEWART, J. and VARELA, F. J., Dynamics of a Class of Immune Networks II. Oscillatory Activity of Cellular and Humoral Components . . 103

DROLET, S. and SANKOFF, D., Quadratic Tree Invariants for Multivalued Characters 117

TORRES, J.-L., Information, Photosynthesis and Temperature of the Earth 131

LETTER TO THE EDITOR

SPEAKMAN, J. R., On Blum's Four-dimensional Geometric Explanation for the 0·75 Exponent in Metabolic Allometry 139

ERRATA 143

Number 2, 14 May 1990

BRUNDEN, M. N., HUFF, R. M., VIDMAR, T. J. and COOPER, M. M., Planning the Purification Process of Active cDNA in Expression Cloning Strategies 145

TYSON, J. T., CHEN, K. C., LEDERMAN, M. and BATES, R. C., Analysis of the Kinetic Hairpin Transfer Model for Parvoviral DNA Replication . 155

LACALLI, T. C., Modeling the *Drosophila* Pair-Rule Pattern by Reaction-Diffusion: Gap Input and Pattern Control in a 4-Morphogen System 171

MORGAN, A. R. and SEVERINI, A., Interconversion of Replication and Recombination Structures: Implications for Terminal Repeats and Concatemers 195

WIEGMANN, D. D., On Assessing the Potential for Evolutionary Change due to Male-Male Competition and Female Choice in Territorial Species 203

NEVELN, B., Comma-free and Synchronizable Codes 209

SANSOM, M. S. P. and MELLOR, I. R., Analysis of the Gating of Single Ion Channels Using Current-Voltage Surfaces 213

LUSTIG, C., PARNAS, H. and SEGEL, L., Release Kinetics as a Tool to Describe Drug Effects on Neurotransmitter Release 225

LAVIGNE, D. M., INNES, S., WORTHY, G. A. J. and EDWARDS, E. F., Lower Critical Temperatures of Blue Whales, *Balaenoptera musculus* . . 249

MAYHEW, T. M., The Surface Area of an Object Revisited—but from Random Directions 259

STONE, M. and HARRISON, D., A Stratified Binomial Marker Model for Bone-marrow Repopulation Experiments 267

JOLICOEUR, P., Bivariate Allometry: Interval Estimation of the Slopes of the Ordinary and Standardized Normal Major Axes and Structural Relationship 275

Number 3, 7 June 1990

ARMSTRONG, R. A., A Flexible Model of Incomplete Dominance in Neighborhood Competition for Space 287

GOODWIN, B. C. and KAUFFMAN, S. A., Spatial Harmonics and Pattern Specification in Early *Drosophila* Development. Part I. Bifurcation Sequences and Gene Expression 303

KAUFFMAN, S. A. and GOODWIN, B. C., Spatial Harmonics and Pattern Specification in Early *Drosophila* Development. Part II. The Four Colour Wheels Model 321

KOZLOV, M. M., CHERNOMORDIK, L. V. and MARKIN, V. S., A Mechanism of Formation of Protein-free Regions in the Red Cell Membrane: the Rupture of the Membrane Skeleton 347

LUNDBERG, P. and ÅSTRÖM, M., Functional Response of Optimally Foraging Herbivores 367

ROBSON, A. J., Efficiency in Evolutionary Games: Darwin, Nash and the Secret Handshake 379

VARÓN, R. and HAVSTEEN, B. H., Kinetics of the Transient-phase and Steady-state of the Monocyclic Enzyme Cascades 397

NUNOGAKI, K. and KASAI, M., How to Separate the H^+ and OH^- Permeabilities: Kinetics of Intravesicular pH Change after Medium pH Jump 415

Number 4, 21 June 1990

HURST, L. D., Parasite Diversity and the Evolution of Diploidy, Multicellularity and Anisogamy 429

KAITALA, V., SMITH, B. H. and GETZ, W. M., Nesting Strategies of Primitively Eusocial Bees: A Model of Nest Usurpation During the Solitary State of the Nesting Cycle 445

GRAFEN, A., Sexual Selection Unhandicapped by the Fisher Process . 473

GRAFEN, A., Biological Signals as Handicaps 517

CUMMINGS, F. W., A Model of Morphogenetic Pattern Formation . . 547

LETTER TO THE EDITOR

LOREAU, M., Competition Between Age Classes, and the Stability of Stage-structured Populations: A Re-examination of Ebenman's Model 567

Index to Volume 144

Action potential and repetitive activity in excitable membranes, fundamental properties of, 37
Age classes, competition between, and the stability of stage-structured populations; a re-examination of Ebenman's model (letter), 567
Allometry, bivariate: internal estimation of the slopes of the ordinary and standardized normal major axes and structural relationship, 275
Allometry, metabolic, on Blum's four-dimensional geometrical explanation for the 0·75 exponent in (letter), 139
Anisogamy, parasite diversity and the evolution of, 429
ARMSTRONG, R. A., A flexible model of incomplete dominance in neighborhood competition for space, 287
ÅSTRÖM, M. (see LUNDBERG, P.), 367

Balaenoptera musculus, lower critical temperatures of, 249
BATES, R. C. (see TYSON, J. T.), 155
Bees, primitively eusocial, nesting strategies of; a model of nest usurpation during the solitary state of the nesting cycle, 445
Behaviour, social, is stabilized by koinophilia, 15
Bifurcation sequences and gene expression; spatial harmonics and pattern specification in early *Drosophila* development, 303
Bistability, electrical, in excitable cells due to non-inactivating sodium channels, computer simulations of; space- and time-dependent behaviour, 75
Blum's four-dimensional geometric explanation for the 0·75 exponent in metabolic allometry (letter), 139
Bone-marrow repopulation experiments, a stratified binomial marker model for, 267
BRUNDEN, M. N., HUFF, R. M., VIDMAR, T. J. and COOPER, M. M., Planning the purification process of active cDNA in expression cloning strategies, 145

Cells, excitable, computer simulations of electrical bistability in, due to non-inactivating sodium channels; space- and time-dependent behaviour, 75
Cell, red, membrane, a mechanism of formation of protein-free regions in, 347
Cellular and humoral components, oscillatory activity of; dynamics of a class of immune networks, 103
Channels, potassium, kinetics of interacting gates in; comparison of linear and non-linear models, 1
Channels, single ion, analysis of the gating of, using current-voltage surfaces, 213
Channels, sodium, non-inactivating, computer simulations of electrical bistability in excitable cells due to; space- and time-dependent behaviour, 75
CHEN, K. C. (see TYSON, J. T.), 155
CHERNOMORDIK, L. V. (see KOZLOV, M. M.), 347
Codes, comma-free and synchronizable, 209
COLDING-JØRGENSEN, M., Fundamental properties of the action potential and repetitive activity in excitable membranes illustrated by a simple model, 37
Comma-free and synchronizable codes, 209
Competition between age classes, and the stability of stage-structured populations: a re-examination of Ebenman's model (letter), 567
Competition, male–male, and female choice in territorial species, on assessing the potential for evolutionary change due to, 203
Competition, neighborhood, for space, a flexible model of incomplete dominance in, 287

Computer simulations of electrical bistability in excitable cells due to non-inactivating sodium channels; space- and time-dependent behaviour, 75
Concatemers: implications of interconversion of replication and recombination structures, 195
COOPER, M. M. (see BRUNDEN, M. N.), 145
CUMMINGS F. W., A model of morphogenetic pattern formation, 547
Current-voltage surfaces in analysis of gating of single ion channels, 213

Development, *Drosophila*, early, spatial harmonics and pattern specification in; bifurcation sequences and gene expression, 303
Development, *Drosophila*, early, spatial harmonics and pattern specification in; the four colour wheels model, 321
Diploidy, parasite diversity and the evolution of, 429
Dithiol-disulfide interconversion, direct transduction of energy by, 69
Diversity, parasite, and the evolution of diploidy, multicellularity and anisogamy, 429
DNA, parvoviral, replication, analysis of the kinetic hairpin transfer model for, 155
cDNA, active, planning the purification process of, in expression cloning strategies, 145
Dominance, incomplete, in neighborhood competition for space; a flexible model, 287
DROLET, S. and SANKOFF, D., Quadratic tree invariants for multivalued characters, 117
Drosophila early development, spatial harmonics and pattern specification in; bifurcation sequences and gene expression, 303
Drosophila early development, spatial harmonics and pattern specification in; the four colour wheels model, 321
Drosophila pair-rule pattern modeling by reaction-diffusion: gap input and pattern control in a 4-morphogen system, 171
Drug effects on neurotransmitter release; release kinetics as a descriptive tool, 225
Dynamics of a class of immune networks: global stability of idiotype interactions, 93
Dynamics of a class of immune networks: oscillatory activity of cellular and humoral components, 103

Earth, temperature of; information and photosynthesis, 131
Ebenman's model re-examined: competition between age classes, and the stability of stage-structured populations (letter), 567
EDWARDS, E. F. (see LAVIGNE, D. M.), 249
Efficiency in evolutionary games; Darwin, Nash and the secret handshake, 379
Electrical bistability in excitable cells due to non-inactivating sodium channels, computer simulations of; space- and time-dependent behaviour, 75
Energy, direct transduction of, by dithiol-disulfide interconversion, 69
Enzyme cascades, monocyclic, kinetics of the transient-phase and steady-state of, 397
Evolution of diploidy, multicellularity and anisogamy; parasite diversity, 429
Evolutionary change due to male-male competition and female choice in territorial species, on assessing the potential for, 203
Evolutionary games, efficiency in; Darwin, Nash and the secret handshake, 379
Expression cloning strategies, planning the purification process of active cDNA in, 145

Female choice in territorial species, on assessing the potential for evolutionary change due to male-male competition and, 203
Fisher process, sexual selection unhandicapped by, 473
Foraging herbivores, functional response of, 367
Functional response of optimally foraging herbivores, 367

Games, evolutionary, efficiency in; Darwin, Nash and the secret handshake, 379
Gates, interacting, in potassium channels, the kinetics of; comparison of linear and non-linear models, 1
Gating of single ion channels, analysis using current-voltage surfaces, 213

Gene expression; spatial harmonics and pattern specification in early *Drosophila* development, 303
GETZ, W. M. (see KAITALA, V.), 445
GOODWIN, B. C. and KAUFFMAN, S. A., Spatial harmonics and pattern specification in early *Drosophila* development. Part I. Bifurcation sequences and gene expression, 303
GOODWIN, B. C. (see KAUFFMAN, S. A.), 321
GRAFEN, A., Biological signals as handicaps, 517
GRAFEN, A., Sexual selection unhandicapped by the Fisher process, 473

Handicaps, biological signals as, 517
HARRISON, D. (see STONE, M.), 267
HAVSTEEN, B. H. (see VARÓN, R.), 397
Herbivores, foraging, functional response of, 367
HUFF, R. M. (see BRUNDEN, M. N.), 145
HURST, L. D., Parasite diversity and the evolution of diploidy, multicellularity and anisogamy, 429
H^+ and OH^- permeabilities, separation of; kinetics of intravesicular pH change after medium pH jump, 415

Immune networks, dynamics of a class; global stability of idiotype interactions, 93
Immune networks, dynamics of a class: oscillatory activity of cellular and humoral components, 103
Information, photosynthesis and temperature of the Earth, 131
INNES, S. (see LAVIGNE, D. M.), 249

JOLICOEUR, P., Bivariate allometry: interval estimation of the slopes of the ordinary and standardized normal major axes and structural relationship, 275

KAITALA, V., SMITH, B. H. and GETZ, W. M., Nesting strategies of primitively eusocial bees: a model of nest usurpation during the solitary state of the nesting cycle, 445

MAYHEW, T. M., The surface area of an object revisited—but from random directions, 259
MELLOR, I. R. (see SANSOM, M.S.P.), 213
Membranes, excitable, fundamental properties of the action potential and repetitive activity in, 37
Membrane, red cell, a mechanism of formation of protein-free regions in, 347
Metabolic allometry, on Blum's four-dimensional geometrical explanation for the 0·75 exponent in (letter), 139
Monocyclic enzyme cascades, kinetics of the transient-phase and steady-state of, 397
MORGAN, A. R. and SEVERINI, A., Interconversion of replication and recombination structures: implications for terminal repeats and concatemers, 195
Morphogenetic pattern formation: a model, 547
Multicellularity, parasite diversity and the evolution of, 429
Multivalued characters, quadratic tree invariants for, 117

Nesting strategies of primitively eusocial bees: a model of nest usurpation during the solitary state of the nesting cycle, 445
Neurotransmitter release, release kinetics as a tool to describe drug effects on, 225
NEVELN, B., Comma-free and synchronizable codes, 209
NUNOGAKI, K. and KASAI, M., How to separate the H^+ and OH^- permeabilities: kinetics of intravesicular pH change after medium pH jump, 415

OH^- and H^+ permeabilities, separation of; kinetics of intravesicular pH change after medium pH jump, 415

Pair-rule pattern, *Drosophila*, modeling by reaction–diffusion; gap input and pattern control in a 4-morphogen system, 171
Parasite diversity and the evolution of diploidy, multicellularity and anisogamy, 429
PARNAS, H. (see LUSTIG, C.), 225
Parvoviral DNA replication, analysis of the kinetic hairpin transfer model for, 155
Pattern formation, morphogenetic: a model, 547
Pattern, pair-rule, *Drosophila*, modeling by reaction–diffusion: gap input and pattern control in a 4-morphogen system, 171
Pattern specification in early *Drosophila* development. Bifurcation sequences and gene expression, 303
Pattern specification in early *Drosophila* development. The four colour wheels model, 321
Permeabilities, H^+ and OH^-, separation of; kinetics of intravesicular pH change after medium pH jump, 415
pH change, intravesicular, after medium pH jump, kinetics of; how to separate the H^+ and OH^- permeabilities, 415
Photosynthesis, information and the temperature of the Earth, 131
Populations, stage-structured, stability of, and competition between age classes; a re-examination of Ebenman's model (letter), 567
Potassium channels, kinetics of interacting gates in; comparison of linear and non-linear models, 1
Primitively eusocial bees, nesting strategies of; a model of nest usurpation during the solitary state of the nesting cycle, 445
Protein-free regions in the red cell membrane, mechanism of formation of, 347

Quadratic tree invariants for multivalued characters, 117

Reaction-diffusion, modeling the *Drosophila* pair-rule pattern by; gap input and pattern control in a 4-morphogen system, 171
Recombination and replication structures, interconversion of; implications for terminal repeats and concatemers, 195
Red cell membrane, mechanism of formation of protein-free regions in, 347
Release kinetics as a tool to describe drug effects on neurotransmitter release, 225
Repetitive activity in excitable membranes, fundamental properties of action potential and, 37
Replication, DNA, parvoviral, analysis of the kinetic hairpin transfer model for, 155
Replication and recombination structures, interconversion of; implications for terminal repeats and concatemers, 195
ROBSON, A. J., Efficiency in evolutionary games: Darwin, Nash and the secret handshake, 379
